

FIRST TASK

<https://xd.adobe.com/view/d0578650-3541-4292-96f3-ae1fe8ea97de-8504/> In this task we want to know the state management skills you have so.

Rules:

- 1- Create this page using [Ant Design](#).
- 2- Build the To-do list above using state management like: Redux, Context API, etc.

Tips:

- Add a new To-do task by clicking the plus button which displays a pop-up to add the name of the task.
- Mark a task as completed by clicking the green check sign.
- Mark a task as canceled by clicking the cross sign.
- Edit active task using the pen sign.
- Delete any task - *even the marked* - from the menu.

Notes:

- Redux Toolkit is a plus.
- Try to make the same design as possible.
- Ant Design will make it easier for you so make sure to use it .

SECOND TASK

<https://xd.adobe.com/view/1a6f3b7b-d7b8-43b3-8709-725045b2da614f3c/screen/fc8b6069-041b-49d2-8981-7ba957c06c3b>

In this task we want to know the design

Rules:

we provided you in the link two pages for the same component so..., You should make the component responsive as shown in each page.

Tips:

- You can use any design method in this task.

Notes:

- This links on XD website needs VPN.
- you must create the components using functional components (*don't use class-based components*).
- Use redux toolkit is a plus.
- You should upload these tasks on Git Repository (GitHub, GitLab, ...) and send the link to us.

IF YOU DIDN'T ACHIEVE THE TASKS IN TIME JUST SEND TO US THE FINAL RESULT YOU REACHED.

Good Luck
